

# PAMPHTER FINANCE.

Whitepaper dedicated to the introduction of Pamphther to the populous, and the unveiling of the team's ambitions to occupy an imperative yet entertaining role in the cryptocurrency space.

# INTRODUCTION & MESSAGE FROM THE TEAM

*Since the inception of communication by ancient humans through body language, our technologic revolutions over the centuries have evolved the human species. Social interactions reaching unprecedented highs, with the risk of being cliché - even "To the Moon". In current times, our proficiency in timely and effective communication through dynamic messaging apps (what would have been interpreted as telepathy a few hundred years ago) has given rise to a populous revolution via memes.*

*Memes have become one of the most effective methods of conveying ideas, beliefs, and even story telling. With pictures saying a thousand words, gifs, mp4s, mkv, and numerous other forms of video have allowed us to present comprehensive ideas to countless people virtually instantaneously. The uprising within the population via a social revolt of the established order has become self sustaining and self replicating through numerous forms of memes. Pampher token is itself a meme - utilising the abundance of communications, the community gathered together from all across the world to begin a collaborative effort of realising the concept of Pampher.*

*Although the quantifiable developments of the Pampher idea is measured via price and various other appraisals, Pampher is an idea, a dream, a meme - of which hopes to grow the cryptocurrency space via an introduction of the populous to this asset class and the capabilities of DeFi. The crypto space as a whole has been continuously bombarded with negative connotation by the mainstream media. With Pampher's tokenomic of whereby 0.1% of every transaction is donated to charity, this is our way of answering back to some of these cryptocurrency pessimists.*

*Through auto-staking and charity donations, Pampher hopes to promote cryptocurrency in a more positive implication, whilst entertaining and educating. We endeavour to help everyone become the best Pampher they can be. Pamp the Pampher.*

*Regards,*

*Pampher Team.*

# TOKENOMICS

## Binance Smart Chain

*Pampher was launched on the Binance Smart Chain (BSC) for low and accessible gas fees. The token contract is designed to reward both HODLers & give to charity simultaneously. Due to the deflationary nature of the token, the circulating supply is constantly being reduced as more transactions are completed. Our token is accessible through the PancakeSwap decentralized finance protocol (built on the BSC platform) where the trading pair is Pampher/BNB (Binance Coin).*

Figure 1: Shows the LP tokens burnt, hence forever locking liquidity.

## Burnt Tokens

*Upon BSC launch, 163,467,577 Pampher tokens (~16.3% of the total supply) were burnt forever, with the LP tokens burnt too (i.e., these are burnt forever). This means the circulating supply at time of launch was 836,532,423 tokens.*

The contract has a built in transaction tax, totalling 2.1%, acting as a tariff. There are numerous tokens in the space which implement a heavy transaction tax system- in most cases this is incorporated to emphasis a "pump and dump" in the price. The team have investigated numerous tokenomic combinations, with the long-term desire for the PAMPHER token be utilised as a store of value and a means of transfer, resulting in a 2.1% tariff to be ideal.

This figure allows for the deflation of the token whilst introducing holders to the space of DeFi through an auto-staking mechanism. The more transactions that are actioned, increases the tokens that are obtained for holders through the reflection tokenomic. The result produced is an ever-decreasing circulating supply - thus, increasing the value of the remaining tokens, developing a store of value through appreciation. As a means of transfer, the tariff allows for a lower cost of use in comparison to other tokens in the space.

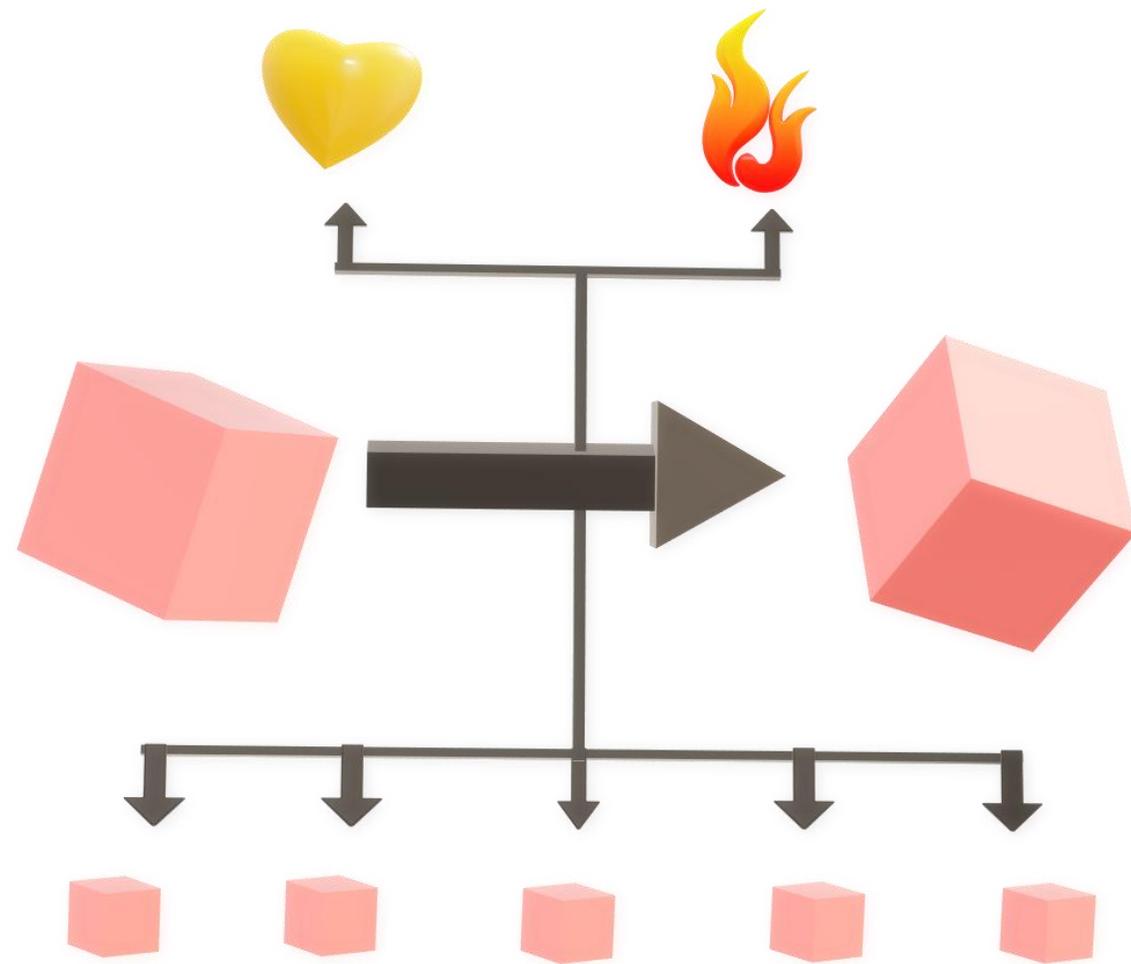

Figure 2: Transaction tariff distribution representation.

### Per Each Transaction:

- 1% is burnt forever, ensuring a deflationary supply.
- 1% is redistributed to Pampher holders, incentivizing holding.
- 0.1% is donated, providing support to the Binance Charity.

# AUDIT

*Given the relatively common occurrence in the crypto space of rug pulls and hacks, the Pampher contract was to be reviewed for any errors or oddities. As such, we have had our contract audited by Solidity Finance, ensuring the code's integrity and inspiring confidence in the community. This was imperative for us to have completed early, as it allows investors to trust our contract is safe- not only from team wrongdoing, but any third party exploits as well.*

*The audit highlights the fact that addresses can be excluded from the fee mechanism. This is in place to allow for 'white-listing' any possible Centralised Exchanges we list on, offering feeless transactions for users on these platforms. However, the 0.1% charity tariff will remain constant on any exchange we list on, as this is a crucial part of our tokenomic process and overall vision for the token. The full results of the audit have been published at the link below.*

# OUR NICHE IN THE MARKET

*2021 has seen the meteoritic rise in "meme tokens". Coins have been popping up left, right and centre all similar in tokenomics, built upon hype and community drive. This uprising reflects the general sentiment within the populous towards meme concepts, which at face value seem shallow and offer no intrinsic value. However, memes in current society have evolved to reflect deeper hidden meanings that are intertwined by the ropes of struggles within society.*

*As noted, in our current climate, a large portion of the general population seeks information from comedians and influencers for insight into issues, contrasted to mainstream media and traditional leaders. This is evidenced by Dogecoin, initially believed to be a 'joke' or a satire cryptocurrency, which has seen an astronomic rise to become not only a common household name but also (in many people's eyes) a legitimate investment option to diversify into the meme or hype space of cryptocurrency.*

*The figures also support the above theories, with Dogecoins total market capitalization reaching as high as \$USD 88 billion (may 7<sup>th</sup> 2021 as reported by CoinMarketCap). This is higher than numerous globally established companies, such as FedEx (~\$80 billion), Nintendo (~\$70 billion), and Heineken (\$68 billion).*

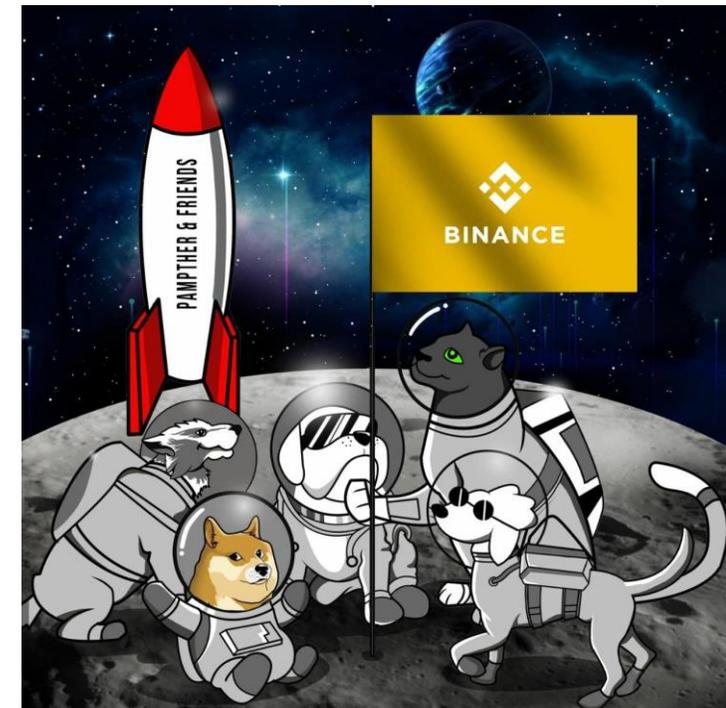

# MOBILE APPS

The Pampher team has combined both the aforementioned crypto meme niche with NFTs (Non-Fungible Tokens). We have brainstormed various ways to synergize these 2 emerging markets, and the result that has been forged is a mobile game, combining popular meme crypto coins, with NFT images as trophies awarded to top users. The initial phase of the game is a score-based game, that has crypto animals (including the Pampher) as in-game skins. Weekly top performers will be issued with NFT(s) that emulate both the theme of that week and the current skins. These will be minted and awarded each week, incentivizing replay-ability.

## Updates for phase 1 will be:

- Adding new map designs, and skins, allowing fresh aesthetics and for us to adapt to emerging market trends.
- Minting and awarding new NFT trophies to reflect the game aesthetic updates.
- Competitions between communities, with tokens and NFTs up for grabs, promoting awareness.

## Virtual Pet

Upon a successful season of phase 1, we will begin development of our second mobile game. The vision we have for this is a role-playing virtual pet experience. The idea behind this game is to bring to life a Pampher as your very own pet that the player is responsible for keeping alive and engaged through a variety of tasks and battling various in game hazards. This phase will also roll out more long-term partnerships, whereby for 1 season, only 1 other crypto coin will be added into the game as an accomplice to Pampher. In this phase we are exploring incorporating the native Pampher currency for in game transactions, increasing token utility.

Any games that we launch will be available on both Android and IOS app stores, completely free.

Our mobile apps are a way to allow our community to have fun, but also add a point of difference to the token, providing opportunity to partner with many other cryptos and increase our overall market exposure.

This in turn allows us to build the Crypto Charity Alliance.

## Crypto Charity Alliance

We plan to form the Crypto Charity Alliance (CCA), which is a coalition with other charity cryptocurrencies. The CCA will be built upon partnerships initially established via our mobile games, that will provide even more charity donations than currently. The framework for this plan will be to host friendly in game challenges between 2 meme communities, where players will donate either of the participating coins' native currency to a honeypot. The winner of the competition will receive 50% of this pot (and bragging rights for their community!), with the other half being donated to a community voted charity.

## Binance Charity

With the desire of wanting in-built functionality that gives back to society; requiring copious amounts of red bull and late nights, the decision was made to donate directly to a charity which aligns with our virtues. The Binance Charity mission statement "We aim to transform philanthropy by developing a 100% transparent donation platform that reaches individual beneficiaries, and we take nothing from the donations". We are proud to support BinanceBCF with every Pampher transaction.

## FUTURE AMBITIONS

*We plan to also list on Centralised Exchanges (CEXs) in the future. These will be carefully selected as exchanges we deem to be in line with Pampher's core values. This will open up Pampher to exponentially more potential investors who may not be comfortable with decentralized exchanges and prefer the more regulated operations and KYC performed by CEXs.*

*Additionally, we will launch Pampher on alternative smart chains i.e., Matic (Polygon) network. We will bridge the current BSC token, ensuring price parity between the two. The reasoning behind this is to reduce dependence on a single chain, provide us with a different dynamic, and remain proactive in the rapidly evolving crypto ecosystem.*

*Also, in the pipeline we have Pampher merch! This will be clothing and items designed by the team, purchasable with our native token! Proceeds from these sales will be used to make more charity donations, and also used as marketing funds, allowing further growth.*

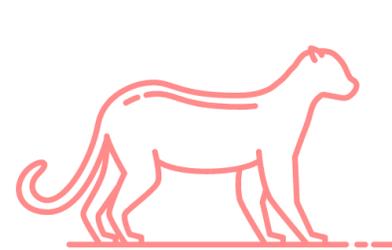

*We will also be hosting meme and NFT design competitions, whereby community voted winners will be eligible for Pampher tokens for their efforts!*

## Game Launchpad

In Q3/Q4 2021, the Pampher Team will be releasing their mobile application game launchpad, acting to reduce the barrier for other tokens creating crypto inspired mobile games for their respective communities. This launchpad will act as an intermediary for other crypto teams to facilitate any game ideas, from conceptualization to deployment.

Payment in the launchpad is expected to be actioned through Pampher tokens. Whereby:

- 1/3 of this payment will be forever burnt.
- 1/3 of this payment will be donated to charity.
- 1/3 of this payment will be used for marketing.

Furthermore, coming in Q3, the Pampher token will implement a governance aspect to the token. Whereby, changes to numerous token aspects will be voted on by governance-directed voting. I.e. the more Pampher tokens the larger the value of the vote. Governance votes will be used to change factors such as which charity to support, tariff amounts, and additional avenues of development (i.e. predication market, new app designs, acceptance of partnerships).

Any decisions independent from contract adjustments (i.e. game skin updates) will be voted upon in our Official Telegram Group:
